Sir:

Please preliminarily amend the above-identified application as follows:

IN THE CLAIMS:

Please cancel claims 18 and 19 and amend claims 17, 20-23 and 26:

17. (Amended) A mobile communication terminal comprising:

message receiving means for receiving a message sent from a
communication partner sending at least the message;

storing means for storing a reception history of the messages received by
said message receiving means;

displaying means for displaying the contents of the reception history of the
messages stored by said storing means,

retrieving means for retrieving address information from the contents of
the reception history of the messages displayed on said displaying means;

first displaying control means for, in the case that there are a plurality of
pieces of address information retrieved by said retrieving means, causing said
displaying means to display the retrieved address information in such a manner that the
retrieved pieces of address information can be discriminated from one another;
